

Solving The Corona Virus

COVID-19 pandemic Vaccination

Can be also a great

Business Opportunity

Join the Corona Vaccine Alliance and Help saving the world!

The problem: Sometime, shortly, the COVID19 vaccines will be approved and starting to be distributed. But, probably it will take many months, even years, till all the billions around the world will be vaccinated... While many millions who are in urgent need of the vaccine - will have to wait. **Exactly to this HUGE niche, CVA is aiming.**

The solution: We are the only **private** organization, who has access to the vaccines when officially approved. Why? The reasons are simple: The vaccine manufacturers and/or distributors know that we have a huge list of people who need the vaccine immediately and are willing to pay a premium price, immediate cash payment, for priority delivery and being a private organization – with zero bureaucracy.

The opportunity: The global market is too big for us to handle or finance. In stage A, we need your help to market & finance the expected global huge demand for building the customers list. Stage B, is only when the markets will be available for parallel markets, only then we'll decide if we want to get into actual vaccines trading or agrigating.

No regulation! It should be emphasized, for now we are offering only mailing-lists - NOT vaccines!!! So zero regulation to be handled.

We are looking for partners to finance/advertise this unique lucrative venture.
